

IN THE CLAIMS:

Please amend claims 1-6 as follows:

~~{Claim 1}~~

1. (Currently Amended) A sunscreen cosmetic, ~~characterized in that it includes the following~~ comprising components (a) through (c) as follows:

a) hydrophobic zinc oxide powder, manufactured through a method in which a zinc oxide powder is dispersed in a solvent, and

the surface of the zinc oxide powder is treated with a phosphate ester having a perfluoroalkyl shown by general formula (1), and

an ester shown by general formula (2) of a copolymer of 30,000-300,000 MW of 2-ethylhexyl acrylate, methacrylate, methyl methacrylate, or butyl methacrylate and a methylpolysiloxane some of whose methyl groups have been substituted with a hydroxypropyl group, to produce the hydrophobic zinc oxide powder,

wherein the hydrophobic zinc oxide powder is manufactured using microparticle zinc oxide powder having a first-order particle diameter of 1 μm or less, and the amount of solvent that is used is within a range of 50 to 90 wt% of the zinc oxide powder;

[Chemical formula 1]

(wherein Rf is a perfluoroalkyl group or a perfluorooxyalkyl group having 3-21 carbons that is a straight chain or branched and is a single chain length or a composite chain length; n is an integer from 1-12, and y is a number from 1-3)

[Chemical formula 2]

— (2) —

(wherein n is an integer, a, b, c, and d are mole ratios within the copolymer and are not 0, and d is at least 40 mole percent but not more than 60 mole percent);

(b) Volatile Silicone; and

(c) C6 to C12 Alkyl Trimethicone (1-10 wt% of the total weight).

{Claim 2}

2. (Currently Amended) The sunscreen cosmetic according to claim 1, wherein the component (c) alkyl trimethicone having 6 to 12 carbons is 12.5 to 40 wt% of the amount of component (b) volatile silicone that is included.

~~{Claim 3}~~

3. (Currently Amended) The water-in-oil emulsified sunscreen cosmetic according to claim 1 [[or 2]], further comprising (d) a lipophilic active material, and (e) water.

~~{Claim 4}~~

4. (Currently Amended) The water-in-oil emulsified sunscreen cosmetic according to ~~any one of claims~~ claim 1 [[to 3]], further comprising (f) an organic modified clay material.

~~{Claim 5}~~

5. (Currently Amended) The sunscreen cosmetic according to ~~any one of claims~~ claim 1 [[to 4]], wherein the sunscreen cosmetic substantially does not include (g) nonvolatile non-polar oil and/or nonvolatile silicone oil, and if it does include these, it includes them at not more than 2 wt% of the total weight of the sunscreen cosmetic.

~~{Claim 6}~~

6. (Currently Amended) The sunscreen cosmetic according to ~~any one of claims~~ claim 1 [[to 5]], wherein an amount of oil that is absorbed by the hydrophobic zinc oxide powder is 10 to 40 mL/100 g.

Please add new claims 7-16 as follows:

7. (New) The water-in-oil emulsified sunscreen cosmetic according to claim 2, further comprising (d) a lipophilic active material, and (e) water.

8. (New) The water-in-oil emulsified sunscreen cosmetic according to claim 2, further comprising (f) an organic modified clay material.

9. (New) The water-in-oil emulsified sunscreen cosmetic according to claim 3, further comprising (f) an organic modified clay material.

10. (New) The sunscreen cosmetic according to claim 2, wherein the sunscreen cosmetic substantially does not include (g) nonvolatile non-polar oil and/or nonvolatile silicone oil, and if it does include these, it includes them at not more than 2 wt% of the total weight of the sunscreen cosmetic.

11. (New) The sunscreen cosmetic according to claim 3, wherein the sunscreen cosmetic substantially does not include (g) nonvolatile non-polar oil and/or nonvolatile silicone oil, and if it does include these, it includes them at not more than 2 wt% of the total weight of the sunscreen cosmetic.

12. (New) The sunscreen cosmetic according to claim 4, wherein the sunscreen cosmetic substantially does not include (g) nonvolatile non-polar oil and/or nonvolatile silicone oil, and if it does include these, it includes them at not more than 2 wt% of the total weight of the sunscreen cosmetic.

13. (New) The sunscreen cosmetic according to claim 2, wherein an amount of oil that is absorbed by the hydrophobic zinc oxide powder is 10 to 40 mL/100 g.

14. (New) The sunscreen cosmetic according to claim 3, wherein an amount of oil that is absorbed by the hydrophobic zinc oxide powder is 10 to 40 mL/100 g.

15. (New) The sunscreen cosmetic according to claim 4, wherein an amount of oil that is absorbed by the hydrophobic zinc oxide powder is 10 to 40 mL/100 g.

16. (New) The sunscreen cosmetic according to claim 5, wherein an amount of oil that is absorbed by the hydrophobic zinc oxide powder is 10 to 40 mL/100 g.
